Ask You to Use Water Wisely

Try out a few of the 100+ Ways to Conserve Water. When it comes to conserving water, small adjustments can have a big impact. Here you can sort through nearly 200 water-saving tips from wateruseitwisely.com.

INDOOR WATER SAVING TIPS - KITCHEN

- #1 There are a number of ways to save water, and they all start with you.
- #2 When washing dishes by hand, don't let the water run. Fill one basin with wash water and the other with rinse water.
- #3 Dishwashers typically use less water than washing dishes by hand. Now, Energy Star dishwashers save even more water and energy.
- #4 If your dishwasher is new, cut back on rinsing. Newer models clean more thoroughly than older ones.
- #5 Designate one glass for your drinking water each day, or refill a water bottle. This will cut down on the number of glasses to wash.
- #6 Soak pots and pans instead of letting the water run while you scrape them clean.
- #7 Use the garbage disposal sparingly. Instead, compost vegetable food waste and save gallons every time.
- #8 Wash your fruits and vegetables in a pan of water instead of running water from the tap.
- #9 Don't use running water to thaw food. For water efficiency and food safety, defrost food in the refrigerator.
- #10 Install an instant water heater near your kitchen sink so you don't have to run the water while it heats up. This also reduces energy costs.
- #11 Keep a pitcher of drinking water in the refrigerator instead of running the tap. This way, every drop goes down you and not the drain.
- #12 Reuse leftover water from cooked or steamed foods to start a nutritious soup, it's one more way to get eight glasses of water a day.
- #13 Cook food in as little water as possible. This also helps it retain more nutrients.
- #14 Select the proper pan size for cooking. Large pans may require more cooking water than necessary.
- #15 If you accidentally drop ice cubes, don't throw them in the sink. Drop them in a house plant instead.
- #16 Collect the water you use while rinsing fruit and vegetables. Use it to water house plants.
- #17 When shopping for a new dishwasher, use the [Consortium for Energy Efficiency website](http://www.consortiumforenergyefficiency.com) to compare water use between models.

INDOOR WATER SAVING TIPS - LAUNDRY ROOM

- #18 When doing laundry, match the water level to the size of the load.
- #19 Washing dark clothes in cold water saves water and energy, and helps your clothes retain their color.
- #20 When shopping for a new washing machine, compare resource savings among Energy Star models. Some can save up to 20 gallons of water per load.
- #21 Have a plumber re-route your greywater to trees and plants rather than the sewer line. Check with your city and county for codes.
- #22 When buying a washer, check the [Consortium for Energy Efficiency website](#) to compare water use between models.

INDOOR WATER SAVING TIPS - BATHROOM

- #23 If your shower fills a one-gallon bucket in less than 20 seconds, replace the showerhead with a [WaterSense® labeled](#) model.
- #24 Shorten your shower by a minute or two and you'll save up to 150 gallons per month.
- #25 Time your shower to keep it under 5 minutes. You'll save up to 1,000 gallons per month.
- #26 Toilet leaks can be silent! Be sure to test your toilet for leaks at least once a year.
- #27 Put food coloring in your toilet tank. If it seeps into the bowl without flushing, there's a leak. Fix it and start saving gallons.
- #28 When running a bath, plug the bathtub before turning on the water. Adjust the temperature as the tub fills.
- #29 [Upgrade older toilets](#) with water-saving [WaterSense® labeled](#) models.
- #30 If your toilet flapper doesn't close properly after flushing, replace it.
- #31 Use a [WaterSense® labeled](#) showerhead. They're inexpensive, easy to install, and can save you up to 750 gallons a month.
- #32 Turn off the water while you brush your teeth and save up to 4 gallons a minute.
- That's up to 200 gallons a week for a family of four.
- #33 If your toilet was installed before 1992, purchasing a [WaterSense® labeled](#) toilet can reduce the amount of water used for each flush.
- #34 Consider buying a dual-flush toilet. It has two flush options: a half-flush for liquid waste and a full-flush for solid waste.
- #35 Plug the sink instead of running the water to rinse your razor and save up to 300 gallons a month.
- #36 Turn off the water while washing your hair and save up to 150 gallons a month.
- #37 When washing your hands, turn the water off while you lather.
- #38 Take 5-minute showers instead of baths. A full bathtub requires up to 70 gallons of water.
- #39 Install water-saving aerators on all of your faucets.
- #40 Drop tissues in the trash instead of flushing them and save water every time.
- #41 Look for [WaterSense® labeled](#) toilets, sink faucets, urinals and showerheads.

#42 One drip every second adds up to five gallons per day! Check your faucets and showerheads for leaks.

#43 While you wait for hot water, collect the running water and use it to water plants.

GENERAL INDOOR WATER SAVING TIPS

#44 Teach children to turn off faucets tightly after each use.

#45 Watch the [Home Water Challenge](#) video or use the [Home Water Audit Calculator](#) to see where you can save water.

#46 When the kids want to cool off, use the sprinkler in an area where your lawn needs it most.

#47 Encourage your school system and local government to develop and promote water conservation among children and adults.

#48 [Play fun games](#) while learning how to save water!

#49 Monitor your water bill for unusually high use. Your bill and water meter are tools that can help you discover leaks.

#50 Learn how to use your water meter to check for leaks.

#51 Reward kids for the water-saving tips they follow.

#52 Avoid recreational water toys that require a constant flow of water.

#53 Grab a wrench and fix that leaky faucet. It's simple, inexpensive, and you can save 140 gallons a week.

#54 Hire a [GreenPlumber®](#) to help reduce your water, energy, and chemical use.

#55 [Be a leak detective!](#) Check all hoses, connectors, and faucets regularly for leaks.

#56 We're more likely to notice leaky faucets indoors, but don't forget to check outdoor faucets, pipes, and hoses.

#57 See a leak you can't fix? Tell a parent, teacher, employer, or property manager, or call a handyman.

#58 At home or while staying in a hotel, reuse your towels.

#59 [Make suggestions to your employer](#) or school about ways to save water and money.

#60 Run your washer and dishwasher only when they are full. You can save up to 1,000 gallons a month.

#61 See how your [water use stacks up](#) to others by calculating your daily water use.

OUTDOOR WATER SAVING TIPS - LAWN CARE

- #81 [Hire a qualified pro](#) to install your irrigation system and keep it working properly and efficiently.
- #82 Hire a professional landscaper who has received landscape training specific to the inland northwest.
- #83 Adjust your lawn mower to the height of 1.5 to 2 inches. Taller grass shades roots and holds soil moisture better than short grass.
- #84 Leave lawn clippings on your grass, this cools the ground and holds in moisture.
- #85 If [installing a lawn](#), select a lawn mix or blend that matches your climate and site conditions.
- #86 Aerate your lawn periodically. Holes every six inches will allow water to reach the roots, rather than run off the surface.
- #87 If walking across the lawn leaves footprints (blades don't spring back up), then it is time to water.
- #88 Let your lawn go dormant (brown) during the winter. Dormant grass only needs to be watered every three to four weeks, less if it rains.
- #89 Avoid overseeding your lawn with winter grass. Ryegrass needs water every few days, whereas Dormant Bermuda grass needs water monthly.
- #90 Remember to weed your lawn and garden regularly. [Weeds](#) compete with other plants for nutrients, light and water.
- #91 While fertilizers promote plant growth, they also increase water consumption. Apply the minimum amount of fertilizer needed.
- #92 Water your summer lawns once every three days and your winter lawn once every five days.
- #93 Catch water in an empty tuna can to measure sprinkler output. 3/4 to 1 inch of water is enough to apply each time you irrigate.

OUTDOOR WATER SAVING TIPS - POOL

- #118 Use a pool cover to help keep your pool clean, reduce chemical use and prevent water loss through evaporation.
- #119 Make sure your swimming pools, fountains and ponds are equipped with recirculating pumps.
- #120 If you have an automatic refilling device, [check your pool periodically for leaks](#).
- #121 When back-washing your pool, consider using the water on salt-tolerant plants in the landscape.
- #122 Minimize or eliminate the use of waterfalls and sprays in your pool. Aeration increases evaporation.
- #123 Don't overfill the pool. Lower water levels will reduce water loss due to splashing.
- #124 Keep water in the pool when playing, it will save water.
- #125 Instead of building a private pool, join a community pool.
- #126 Trickling or cascading fountains lose less water to evaporation than those that spray water into the air.

GENERAL OUTDOOR WATER SAVING TIPS

- #128 Winterize outdoor spigots when temperatures dip below freezing to prevent pipes from leaking or bursting.
- #129 For more immediate hot water and energy savings, insulate hot water pipes.
- #130 Use a commercial car wash that recycles water. Or, wash your car on the lawn, and you'll water your grass at the same time.
- #131 Use a hose nozzle or turn off the water while you wash your car. You'll save up to 100 gallons every time.
- #132 Wash your pets outdoors, in an area of your lawn that needs water.
- #133 When cleaning out fish tanks, give the nutrient-rich water to your non-edible plants.
- #134 When you give your pet fresh water, don't throw the old water down the drain. Use it to water your trees or shrubs.
- #135 Use a broom instead of a hose to clean patios, sidewalks and driveways, and save water every time.
- #136 Evaporative coolers require a seasonal maintenance check. For more efficient cooling, check your evaporative cooler annually.
- #137 If you have an evaporative cooler, direct the water drain to plants in your landscape.
- #138 Set water softeners for a minimum number of refills to save both water and chemicals, plus energy, too.
- #139 If you have an evaporative cooler, install a recirculating pump to keep water from bleeding off with one pass.
- #140 Report broken pipes, leaky hydrants and errant sprinklers to property owners or your local water provider.
- #141 Know where your master water shut-off valve is located. Were a pipe to burst, this could save gallons of water and prevent damage.
- #142 Install a thermostat and timer on your evaporative cooler so it only operates when necessary.

WATER SAVING TIPS FOR THE OFFICE

- #10 Install an instant water heater near your kitchen sink so you don't have to run the water while it heats up. This also reduces energy costs.
- #29 [Upgrade older toilets](#) with water-saving [WaterSense® labeled](#) models.
- #39 Install water-saving aerators on all of your faucets.
- #41 Look for [WaterSense® labeled](#) toilets, sink faucets, urinals and showerheads.
- #54 Hire a [GreenPlumber®](#) to help reduce your water, energy, and chemical use.
- #143 Some commercial refrigerators and ice-makers are cooled with water. Upgrade to air-cooled appliances for significant water savings.
- #144 Post a hotline in bathrooms and kitchens to report leaks or water waste to facility managers or maintenance personnel.
- #145 Create a suggestion and incentives system at your organization to recognize water-saving ideas.
- #146 Include a water-saving tip in your employee newsletter. Find 100+ tips at [wateruseitwisely.com](#).
- #147 Implement a water management plan for your facility, then educate employees on good water habits through newsletters and posters.
- #148 Publish your organization's monthly water use to show progress toward water-saving goals.
- #149 Invite your water utility conservation staff to your organization for Earth Day and other environmental events to help promote water savings.
- #150 Water audit your facility to find out your recommended water use, then monitor your utility bills to gauge your monthly consumption.
- #151 Have maintenance personnel regularly check your facilities for leaks, drips and other water waste.
- #152 If you use processed water in your business or facility, look into water recycling.
- #153 Contact your water utility to see if rebates are available for purchasing water-efficient fixtures, equipment or for facility audits.
- #154 Consider and compare water use when purchasing ice makers, dishwashers, reverse osmosis units, coolers and cleaning equipment.
- #155 Become or appoint a water ambassador within your organization who creates, implements and maintains your water conservation program.
- #156 Become a proud [WaterSense®](#) partner and let all your customers know.
- #157 As part of the WaterSense® Fix-A-Leak Week, plan an employee campaign to look for leaks.
- #158 Determine how your on-site water is being used by installing sub-meters where feasible, then monitoring for savings.
- #159 Conduct a facility water use inventory and identify water management goals.
- #160 Don't forget hidden water use costs, like energy for pumping, heating and cooling, chemical treatment, and damage and sewer expenses.
- #161 Show your company's dedication to water conservation through a policy statement.

Commit management, staff and resources to the effort.

#162 Shut off water to unused areas of your facility to eliminate waste from leaks or unmonitored use.

#163 Create a goal of how much water your company can save and plan a celebration once that goal is met.

#164 Ask employees for suggestions on saving water and give prizes for the best ideas. Incentivize it!

#165 Write feature articles on your employee website that highlight water-saving ideas and successes.

#166 Test your co-workers or employees on topics like xeriscape, WaterSense®, and high-efficiency toilets. See how water-wise they are.

#167 Hire a [WaterSense® irrigation partner](#) to help with your landscape.

#168 Saving water on your landscape adds up quickly. Send the person in charge of your landscape to an irrigation workshop.

#169 Marry the weather with your landscape water use. Water use should decrease during rainy periods and increase during hot, dry periods.

#170 Visit your local Water Conservation office's website to get information on programs available to businesses.

#171 Make sure your contract plumber and/or maintenance personnel knows about [GreenPlumbers®](#).

#172 Ask your company to support water conservation events and Education. [Project Wet](#) hosts local events throughout the country.

#173 Use refillable water bottles and forgo disposable plastic bottles to lower your carbon footprint.

#174 Scrape dishes rather than rinsing them before washing.

#175 Use water-conserving icemakers.

#176 A recent study showed that 99% of business managers surveyed ranked water conservation as a "top five" priority over the next decade.

#177 If your facility relies on cooling towers, have maintenance maximize cycles of concentration by providing efficient water treatment.

#178 Be sure your irrigation system is watering only the areas intended, with no water running onto walks, streets or down the gutter.

#179 While cleaning sidewalks, a hose and nozzle use 8-12 gallons of water per minute. A pressurized Waterbroom® uses closer to 3 gallons.

#180 Inspect your landscape irrigation system regularly for leaks or broken sprinkler heads and adjust pressures to specification.

#181 Give your landscape proper amounts of irrigation water. Determine water needs, water deeply but infrequently, and adjust to the season.

#182 Establish a monthly water budget for your landscape based on the water needs of your plants.

#183 Limit turf areas at your facility. Instead, landscape using [xeriscape principles](#) to cut water use in half.

#184 Put decorative fountains on timers and use only during work or daylight hours. Check for leaks if you have automatic refilling devices.

#185 Wash company vehicles at commercial car washers that recycle water.

#186 Wash company vehicles as needed rather than on a schedule. Stretch out the time in between washes.

#187 Consider turning your high-maintenance water feature/fountain into a low-maintenance art feature or planter.

#188 When buying new appliances, consider those that offer cycle and load size adjustments. They are more water and energy efficient.

#189 Support projects that use reclaimed wastewater for irrigation and industrial uses.

#190 When ice cubes are leftover from your drink, don't throw them out. Pour them on a plant.
