MCL: Maximum Contaminant Level or MCL - The highest level of a contaminant that is allowed in drinking water. MCLs are set as protective levels below which there is no known or anticipated health risk. MCLs are enforceable standards.

Notes:
A). Not Analyzed
B. MCL not Enforced
C). Analyses by private lab.
D). Action levels not exceeded
E). Action levels exceeded

As you can see by the table, our system had no violations above the allowed Maximum Contaminant Levels. We're proud that your drinking water meets or exceeds all Federal and State requirements and although we have learned through monitoring and testing that some constituents have been detected, the EPA has determined that your water is SAFE at these levels.

Water...Every Drop Counts

Did you know that an average American home can waste more than 10,000 gallons of water every year due to running toilets, dripping faucets and other household leaks? Nationwide, more than 1 trillion gallons of water leak from U.S. homes each year. That’s why North Spokane Irrigation District #8 reminds you to check your plumbing fixtures and irrigation systems every year to reduce the potential losses. For both Indoor and Outdoor Water Saver Kits for your home, please contact North Spokane Irrigation District #8 (509)467-6727.

Emergency Interruption

The District has an emergency interruption at Francis & Freya with the City of Spokane if an event were to occur that required a back-up water supply.

Attention Customers!

Please call our office and make sure your accounts are up to date with contact information (Phone numbers & Mailing Address)

As required by Washington State Department of Health, a report on your water quality is included. The District routinely samples for microbial contaminants such as Coliform Bacteria, E coli and Fecal Coliform, which may come from the environment, septic systems, agricultural livestock operations and wildlife. During 2019, 24 tests were taken and all tests were negative for presence of these contaminants.

Wellhead Protection

The District is a member of the Spokane Aquifer Joint Board (SAJB) which represents nineteen (19) water purveyors who utilize the Spokane/Rathdrum Prairie Aquifer for their water supply. The SAJB promotes aquifer awareness through various educational programs. Committees on proactive businesses, potential contaminant source inventory, household contaminant disposal, emergency planning and education and awareness strive to educate the public and protect our sole source of drinking water. Please visit the web site at www.spokaneaquifer.org for further information and a virtual aquifer tour.

Consumer Confidence Report

~ Spring 2020 Newsletter ~

Good news! Our latest results show that your water meets or exceeds all Federal and State requirements. Our system has been in compliance with all required processes, and all constituents have been tested as required by the Washington State Department of Health.

Water Use Efficiency Annual Performance Report - 2019

North Spokane Irrigation District No. 8

Notes:
- No violations above the allowed Maximum Contaminant Levels.
- Your water is SAFE at these levels.

If you have any questions or concerns about your drinking water, you may wish to have your water tested. Information on lead in drinking water, testing methods, and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at http://epa.gov/safewater/lead

Protect your Spokane Aquifer. Don’t Pollute It - It’s beneath you
